-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 June 2005.
 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7, 11 and 12 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) ☐ Claim(s) _____ is/are allowed.
 6) ☒ Claim(s) 1-6 and 11 is/are rejected.
 7) ☒ Claim(s) 7 and 12 is/are objected to.
 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
 10) ☒ The drawing(s) filed on 23 June 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
 * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
 Paper No(s)/Mail Date _____.
 4) ☐ Interview Summary (PTO-413)
 Paper No(s)/Mail Date _____.
 5) ☐ Notice of Informal Patent Application (PTO-152)
 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 6, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Wright (US Pat 4072920).

Wright discloses:

- {claim 1} a device to hold a flexible substrate to be printed upon (column 1, lines 8-21); a static structure (figure 1, reference 10); elongated support units, each having a bottom surface supported by the support structure, wherein the units positioned remote from and substantially parallel to each other such that top surfaces of the units delineate a convex profile in a plane perpendicular to a longitudinal axis of the units (figure 1, reference 13); a tensioning device configured so as to produce tension in the flexible substrate, the tension being along a feed path of the flexible substrate parallel to the plane (figure 1; column 1, lines 8-21; tension inherently caused by magnetic force)

- {claim 4} wherein the support units are support bars (figure 1, reference 13)

Art Unit: 2853

- {claim 6} wherein the support structure is a substantially continuous solid surface (figure 1)
- {claim 11} wherein the support units are rods (figure 1, reference 13)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wright (US Pat 4072920) in view of Hallman et al (US Pat 5820932).

Wright discloses a device (as applied to claim 1 above).

Wright differs from the claimed invention in that it does not disclose:

- {claim 2} a digital printing device including a plurality of print heads

Hallman et al discloses:

- {claim 2} a digital printing device including a plurality of print heads (abstract)

It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Hallman et al into the invention of Wright.

The motivation for the skilled artisan in doing so is to gain the benefit of providing an environmentally friendly means of printing on a printing plate (column 2, lines 13-15).

Art Unit: 2853

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wright (US Pat 4072920) in view of Hallman et al (US Pat 5820932), as applied to claim 2 above, and further in view of Tajika et al (US Pat 5988783).

Wright, as modified, discloses:

- {claim 5} wherein the print heads are positioned such that when the flexible substrate is placed upon the support structure, portions of the flexible substrate that are stretched between the support units are located below the print heads (naturally suggested in view of combination of Wright in view of Hallman et al)

Wright, as modified, differs from the claimed invention in that it does not disclose:

- {claim 3} wherein the printing device is a digital four color process printer and the plurality of print heads includes four print heads

Tajika et al discloses:

- {claim 3} wherein the printing device is a digital four color process printer and the plurality of print heads includes four print heads (figure 8, reference C, M, Y, K)

It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Tajika et al into the invention of modified Wright. The motivation for the skilled artisan in doing so is to gain the benefit of printing in different colors.

Allowable Subject Matter

Art Unit: 2853

Claims 7 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 7 discloses “wherein the tensioning device is integral to a feed and take-up device which moves the flexible substrate across the support structure,” which was not found, taught, or disclosed in the prior arts.

Claim 12 discloses “wherein the support units are rollers,” which was not found, taught, or disclosed in the prior arts.

Response to Arguments

Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lippincott (US Pat 2108822) discloses a printing plate and formation thereof.

Minton (US Pat 2408526) discloses a glass supporting skeleton mold.

Jacobson (US Pat 2421150) discloses a contact printer.

Smith (US Pat 3187657) discloses photo-copying devices.

Miyatani et al (US Pat 4678292) discloses a curved structure and method for making same.

Komae (JP Pat 63149997A) discloses the manufacture of piezoelectric speaker.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

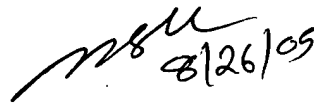

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leonard S. Liang whose telephone number is (571) 272-2148. The examiner can normally be reached on 8:30-5 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Art Unit: 2853

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
